Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge. Caltrans, CHP and Monterey County Sheriff's Office are on site. Caltrans engineers have been inspecting the bridge on a regular basis.

The Cal OES Coastal Duty Officer (CDO) reported on 03/16/17:

- The demolition process has begun. Equipment difficulties and method of demolition have caused delays
- The southern detour route is open as of 03/13/17 to local traffic only.
 - The roadway continues to deteriorate as slide activity continues daily.
 - There will be a last opportunity for residents south of Pfeiffer Canyon Bridge to "resupply" using Highway 1, tentatively scheduled for Friday, 03/17/17 between 1000 and 1500 hours, if construction begins at Paul's Slide Monday, 03/20/17.
 - Access will be limited to vehicles under 50,000lbs with a maximum vehicle length of 30 feet
 - There are no plans to place a temporary bridge since it can draw resources away from the replacement and ultimately delay repairs

WEATHER OF CONCERN

Weather of Concern

- Northern California will return to an extended wet pattern starting late tonight into next week.
 - Several storm waves will track across the region, however, more significant storms are expected next week.
 - This wet pattern will not be as strong as the Atmospheric Rivers we experienced in January and February.
- High pressure will dominate portions of Southern California through the weekend which will keep conditions on the warmer side.
 - Inland highs today will be well above the average for March.
 - However, by Tuesday a storm system will approach the region, resulting in cooler and showery weather.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php - Temporarily unavailable. NWS is in the process of repairing the page.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

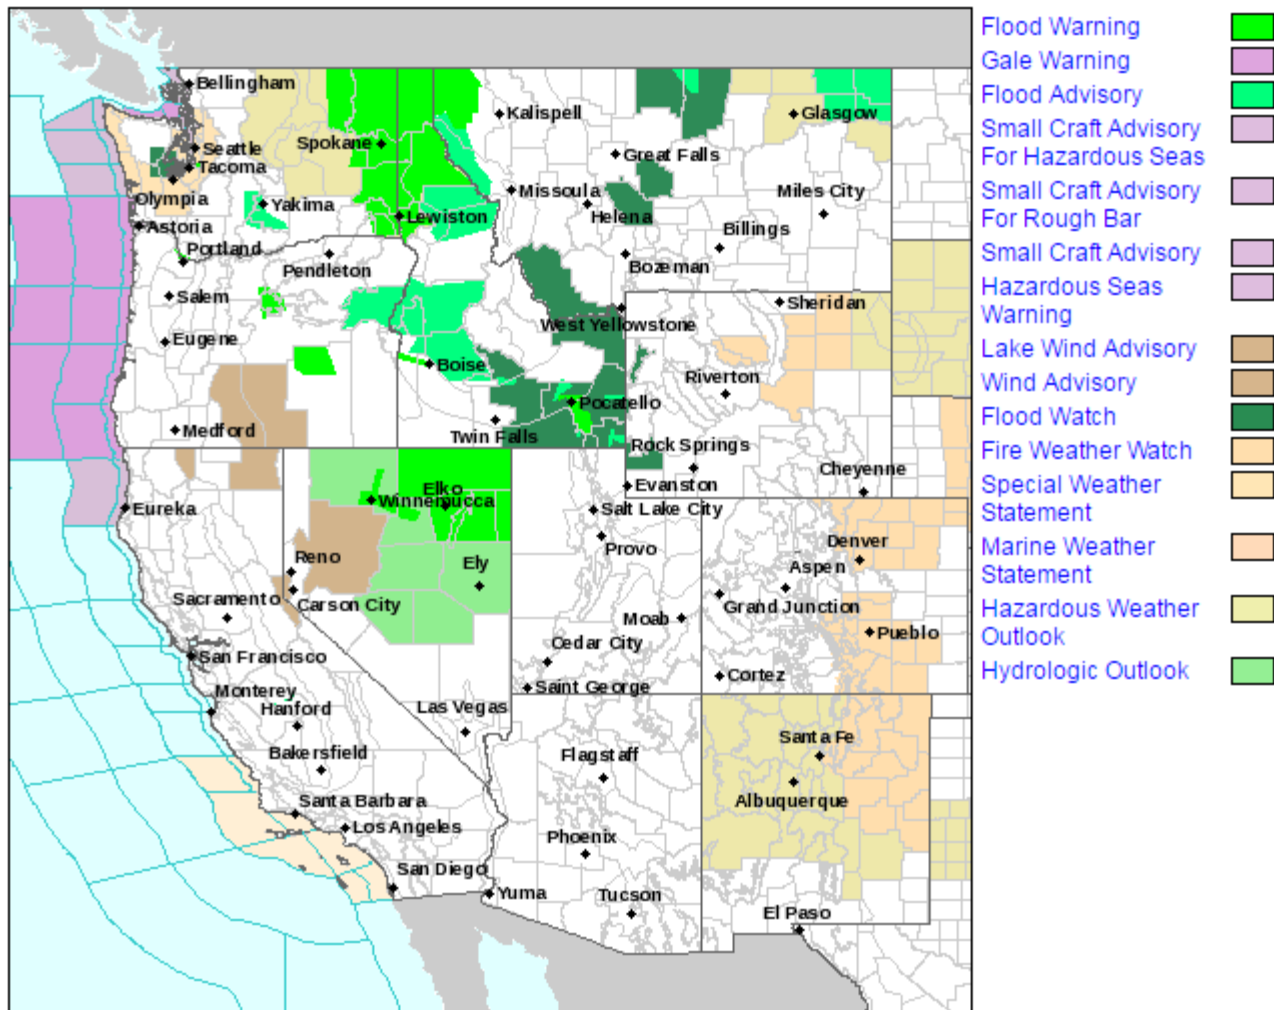

A mix of weather conditions will be over the region today. Warmer, dry weather will prevail across much of the region, but the northwest quarter will see increasing cloudiness and areas of precipitation developing during the day. Cloudiness will be increasing overnight for all areas, but the precipitation from the incoming system is not expected to spread through more of the region until Saturday, and that will mostly occur in the western half. Unsettled weather with periods of precipitation can be expected Sunday through next week, and any dry periods are likely to be much shorter than the wet periods. The lowest snow levels through early next week will be in the northern areas where they shouldn't be any lower than about 6000 feet through the weekend and about 5000 feet early next week. Snow levels in the southern areas will generally be at least 2000 feet higher than that. There will likely be some areas of gusty southerly winds to develop this afternoon and Saturday, mostly in the northern and eastern mountains.

SOUTHERN CALIFORNIA

A strong ridge of high pressure will maintain well above normal temperatures today. Maximum temperatures will be in the 60s to low 70s across the mountains and upper 70s and 80s in the valleys. The ridge will weaken this weekend bringing a little cooling, with upper 50s and 60s across the mountains and mid 70s to mid 80s in the valleys. Minimum humidity will be mainly between 15% and 30% through this weekend. A series of Pacific troughs will bring below normal temperatures next week. These troughs will bring showers to the region at times Tuesday morning through the end of next week. At this time, it looks as though most locations will receive less than a quarter inch of rainfall with the first trough Tuesday and Wednesday. However, the foothill and mountain locations of Central California will receive between 1 and 2 inches of rainfall. South to west winds of 15 to 25 mph with gusts to 40 mph will surface across the mountain ridges and desert passes Saturday afternoon through Monday morning and then increase to 20 to 30 mph with gusts to 50 mph Monday afternoon through the end of next week.
